Andrew Whelchel, Principal Solutions Engineer, Okta Andrew Whelchel (CISSP-ISSAP, CCSP) started in information security and IAM after graduation from the University of Memphis, supporting identity and access management. He managed Microsoft Identity for US Federal customers, transitioned to network infrastructure security and later to consumer identity protection. His most recent roles are at RSA Security and Okta. At Okta, focus is on both protecting employee, partner, and citizen consumer identities for US Federal customers in order to reduce cyber risk as well as accelerate capabilities for cloud transformation. Andrew's contributions include work as a contributor on the NIST 1800-3 (Attribute Based Access Control) Attribute Based Access Control standard and speaking events on identity access management and security.
