

Brian Drake is the Director of Artificial Intelligence within the Future Capabilities and Innovation Office at the Defense Intelligence Agency. He leads the agency's artificial intelligence research and development investment portfolio. As an analyst he led multiple teams countering threats from state and non-state actors across technology, counterintelligence, and counter-narcotics topics. He previously was a Manager with Deloitte Consulting and a management consultant with Toffler Associates specializing in strategic planning, business development, collaboration consulting, technology, and innovation for commercial and government clients. He also worked as a military platforms and policy analyst for Systems Planning and Analysis and as a nuclear weapons programs analyst for DynCorp. He holds a Bachelor of Arts degree from Mercer University and a Masters from Georgetown University. Apart from his official responsibilities, he is the President and Chief Executive Officer of the Defense Intelligence Memorial Foundation; a scholarship fund for the children of fallen Defense Intelligence officers.
