

Our Mission is Helping You Meet Your Mission

TD SYNnex Public Sector Makes it Easy to Plan and Procure Innovative and Cutting-Edge Technologies to Help You Meet Your Organization's Mission, Goals and Objectives

From the classroom to the U.S. Capitol, and from the front office to the front lines, the issues facing the U.S. public sector — ensuring national security, improving citizen services, protecting the supply chain, mitigating cyber risks and so much more — require innovative solutions, delivered on schedule and within budget. Navigating the acquisition process and determining the most appropriate solutions to ensure mission success can be daunting without the support of a trusted advisor.

TD SYNnex Public Sector is both a broadline distributor and a specialized U.S. public sector solutions aggregator. We have a complete technology portfolio and robust roster of in-house subject matter experts available to help find creative solutions for every situation. With over 130 contract vehicles, more than 250 technology vendors, and 10,000+ channel partners to choose from, we can modernize your organization's IT environment while offering full lifecycle support.

We Can Transform Your Organization

TD SYNnex Public Sector has extensive experience in understanding the complexities and challenges that U.S. public sector IT managers face, driving requirements and delivering results for end-users. Our complete technology portfolio — from endpoint devices and edge computing, to advanced integrated solutions — helps us find creative solutions for every situation to ensure your organization meets its mission. Here's why TD SYNnex Public Sector is a trusted advisor:

- **Distribution:** We call ourselves a value-added distributor. Our ability to stock inventory, ship it and manage logistics sets us apart.
- **Specialization:** We don't just focus on technology but on domain-specific solutions including cybersecurity, application lifecycle management, IT infrastructure, and data and analytics.
- **Expertise:** Our deep bench of subject matter experts and industry-leading practitioners offer specialized knowledge of how to best approach complex objectives.
- **Ease:** We make it easier for stakeholders — including technology vendors, channel partners and the end-user organizations — to work within the U.S. public sector ecosystem. We offer total, comprehensive solutions.
- **Engagement:** We have prebuilt channels and programs around five technology domains that help keep us engaged with our end-users.
- **Support:** We offer full lifecycle support from planning to procurement to execution to results.
- **Talent:** Our deep bench of experienced industry-leading practitioners and former government employees have decades of market experience, offering a unique level of insight into how to best support you and your agency's mission.

Supporting the Mission of the U.S. Public Sector

We have a deep understanding of the complex needs of the U.S. public sector and our goal is to help you meet your objectives and mission. Here's how we offer individualized, reliable support:

- **End-users need to establish themselves as an effective problem-solver and successful leader:** With a combined 75 years of experience in the market, we are the trusted advisor to the U.S. public sector. Our processes, refined over decades, ensure compliance, mitigate risk and enable full lifecycle support, helping position you as a leader.
- **End-users need the right IT solutions implemented within schedule, budget and scope:** We have a complete technology portfolio and an extensive roster of subject matter experts on board who can share their insights and experience to help us find creative solutions.
- **End-users need support navigating the acquisition process to ensure program success:** We make it easier for technology companies, their channel partners and U.S. public sector end-users to do business with each other:
 - Our proprietary Enterprise Agreement Platform (EAP) streamlines the procurement process and provides asset visibility and tracking.
 - Our Secure Software Factory (SSF) offers a myriad of pre-vetted solutions that are ready to meet your IT needs efficiently and within budget.
 - Our Diversity Alliance Program (DAP) ensures you can procure from the type of businesses you need.
- **End-users need to modernize their IT systems:** We have a complete technology portfolio to modernize your IT systems and find creative responses to every situation. We make it easy to procure innovative and cutting-edge technology that delivers results:
 - We have 130+ contract vehicles with flexible buying options.
 - We have 250+ technology vendors to choose from.
 - We have 10,000+ channel partners.
 - We are technology and vendor agnostic with thousands of IT options.
 - We have a vendor-certified sales team.

TD SYNnex Public Sector

- 400 employees
- Extensive contract and diverse partner portfolio
- Technical enablement and support services
- Purpose-built demand generation and channel enablement
- Strategic tech domain alignment
- Market sector expertise

Harnessing the Power of Technology

Successful mission outcomes require modern, innovative technology solutions. Here's a sample of what we specialize in:

Cybersecurity

As cyber architects, we build and implement modern and compliant cybersecurity solutions to protect against the rapidly evolving threats.

IT Infrastructure

From updated on-premises technology stack to full cloud deployment, we advance your infrastructure modernization goals, no matter where you are in your journey.

Data and Analytics

We provide our end-users, channel partners and technology vendors with access to advanced-level data engineering talent, processes and analytics capabilities.

TD SYNnex Public Sector combines the strengths and legacies of three organizations to form a powerhouse built with a purpose. Our primary objective is to enable our technology partners' government and education end-users with IT solutions to meet their mission with innovation, scale and ease. TD SYNnex Public Sector's 75 years of combined dedication and service to the U.S. public sector, along with our reach back to 22,000+ of the IT industry's best and brightest, positions us as the best advisor to help your organization in its pursuit to serve and protect our nation.
