

Lerone Banks, Ph.D is a public interest technologist. He currently serves as a subject matter expert for the Federal Trade Commission (FTC), America's consumer protection agency. A product of public institutions and beneficiary of public support, Lerone is sincerely committed to using his talents to tackle issues of national interest. As the first full-time computer scientist hired within the Division of Privacy and Identity Protection (DPIP) at the FTC, Lerone advises federal and state attorneys on tech trends related to the security and privacy of the personal data of American citizens and non-US citizens through multi-national agreements. In his role at the FTC, Lerone leads technical investigations into the data security and privacy practices of private sector businesses. While his name rarely appears on legal documents, his fingerprints are on every significant technical matter facing the FTC's Bureau of Consumer Protection, including investigations into Apple, Amazon, Google, Facebook, LifeLock, Equifax, and Ashley Madison. Lerone is a thoughtful advisor, enthusiastic educator, curious researcher, and highly sought trusted resource among consumer protection professionals.
